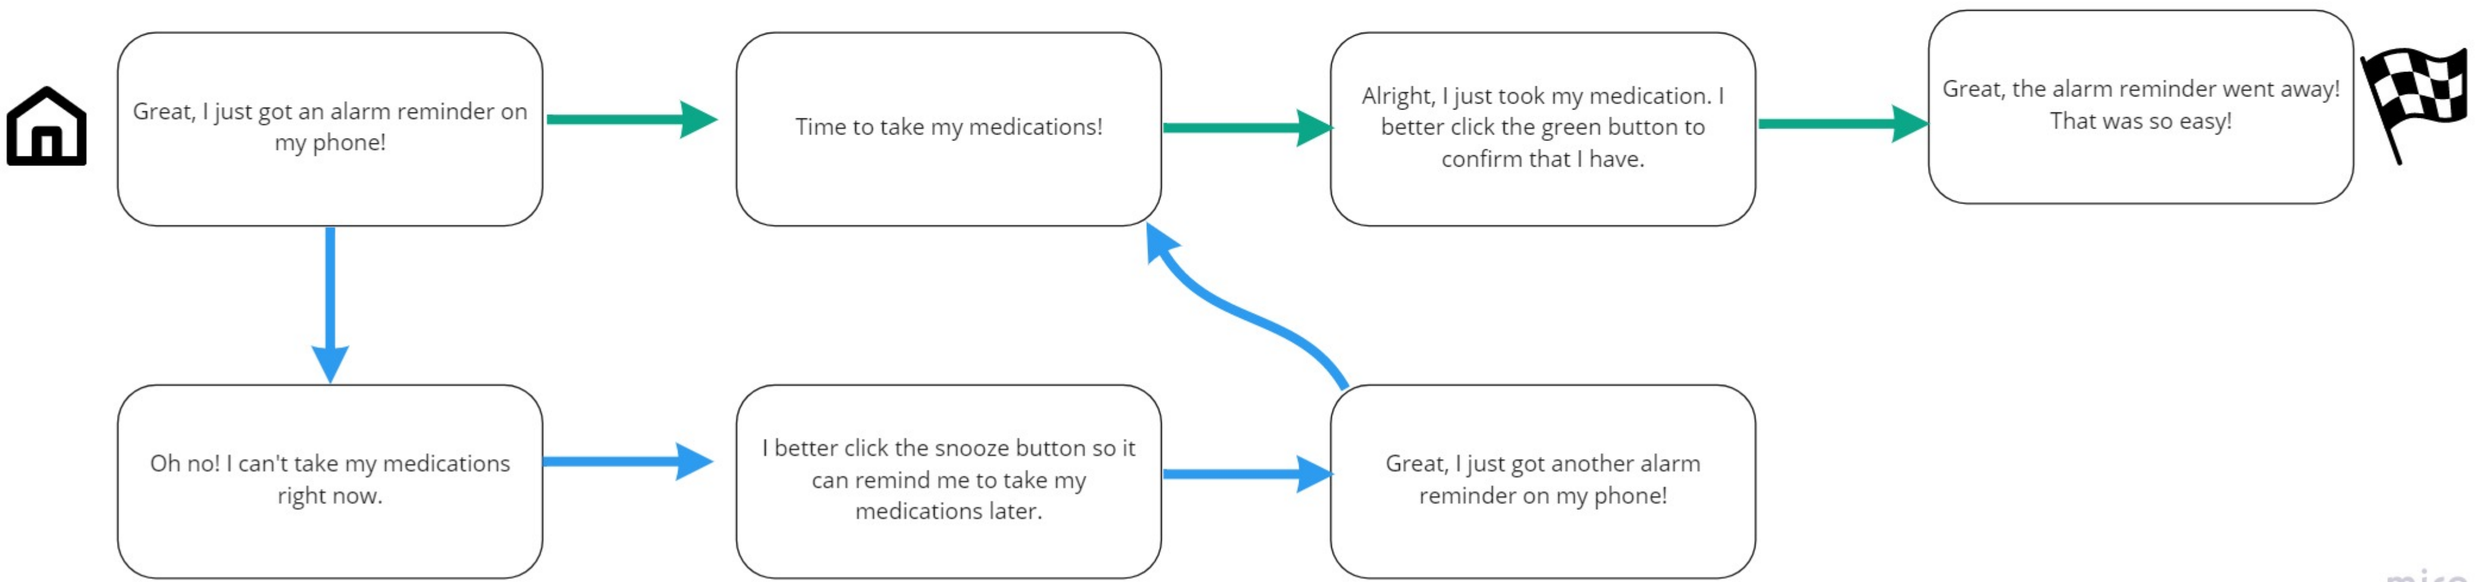
Use Case 3: Record Taken Medication

Customer: Bob

Start: I need to be able to let my daughter know that I have taken my medication so she doesn't have to call me.

Goal: Record taken medications through the app.



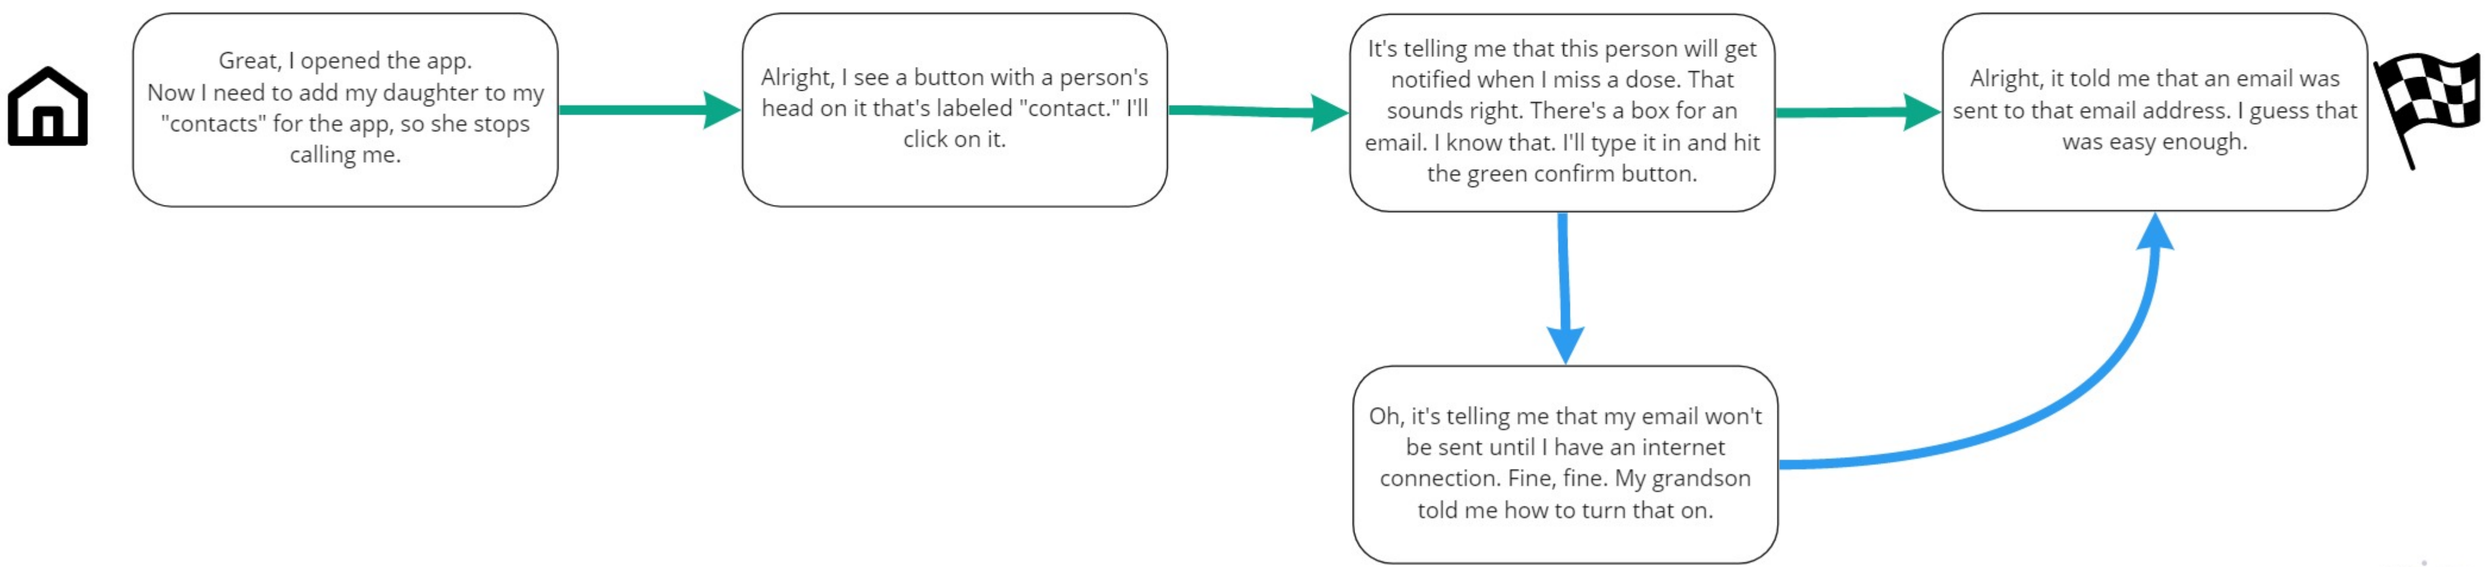
miro

Use Case 2: Enter a Contact's Information

Customer: Bob

Start: I would like to enter the contact information for my daughter.

Goal: Have my daughter as my emergency contact so she can check on me if I miss a dose.



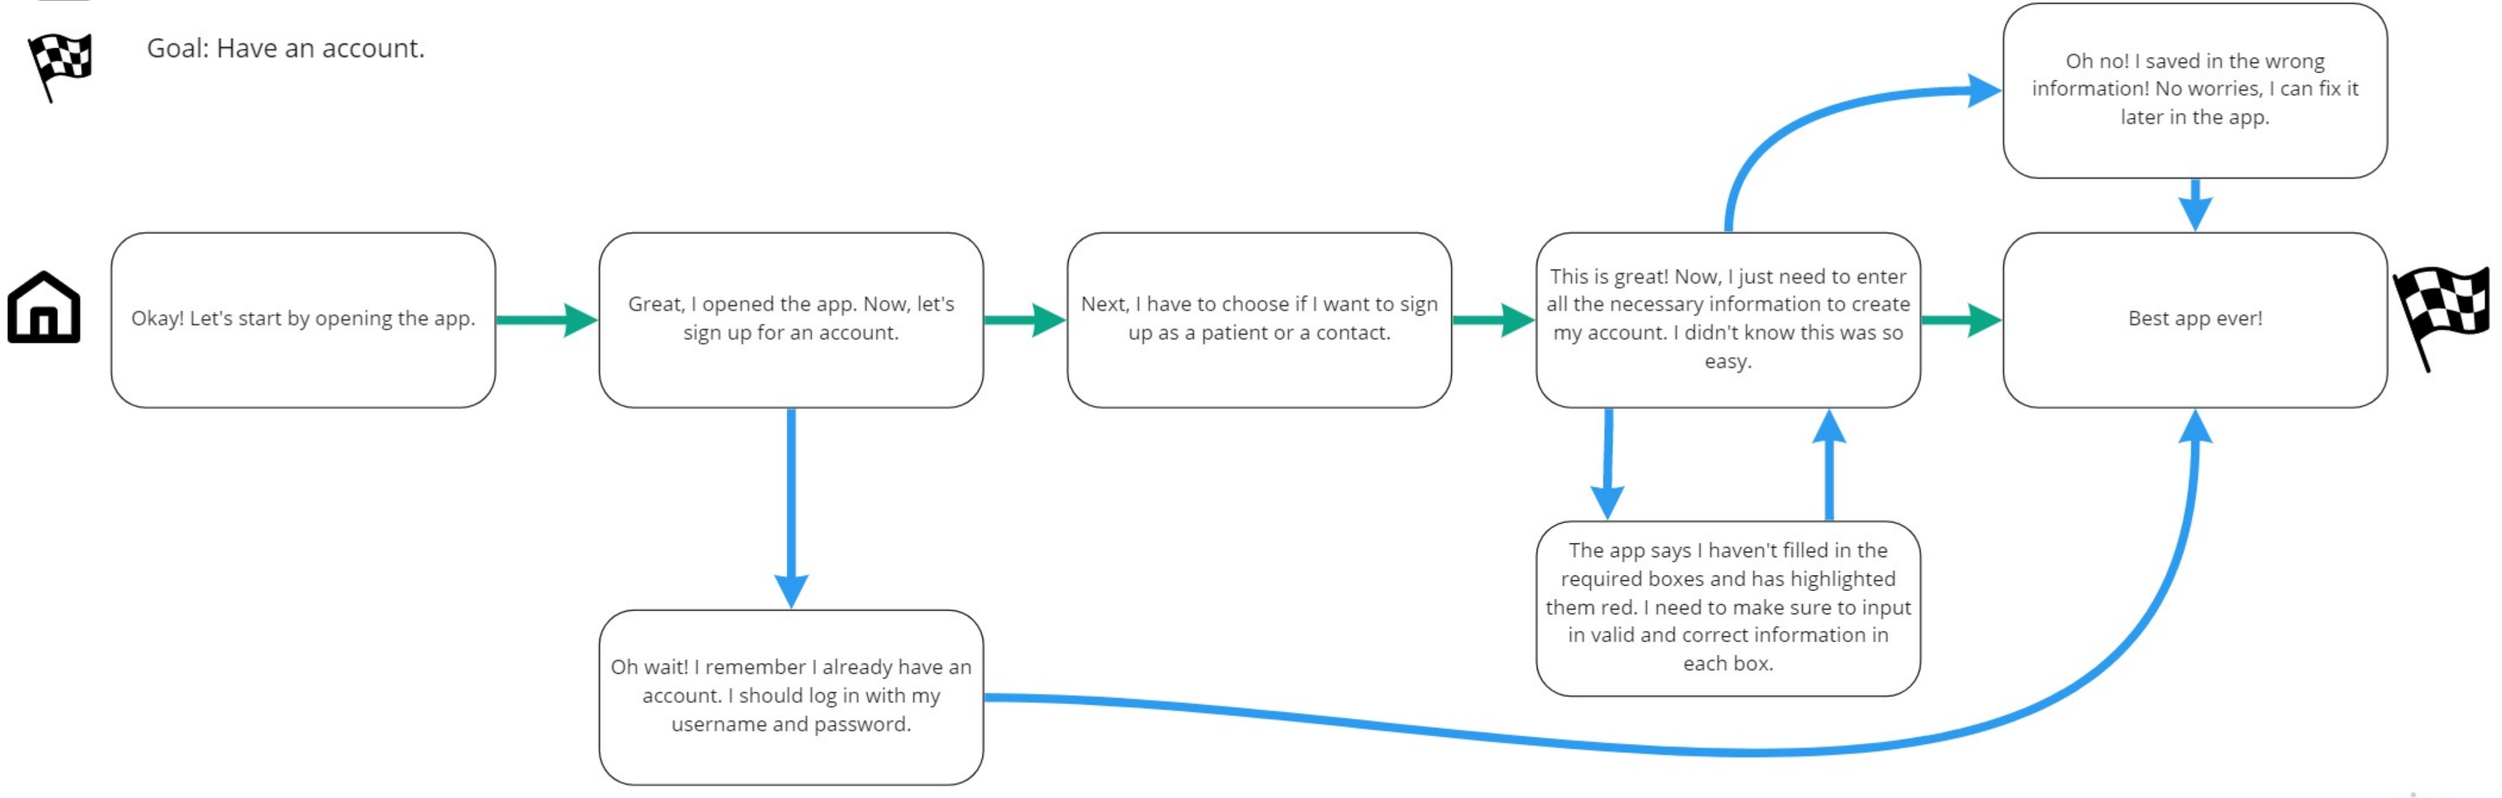
miro

Use Case 1: Mobile App Sign Up

Customer: Mobile app user

Start: I need to create an account for the app I installed.

Goal: Have an account.



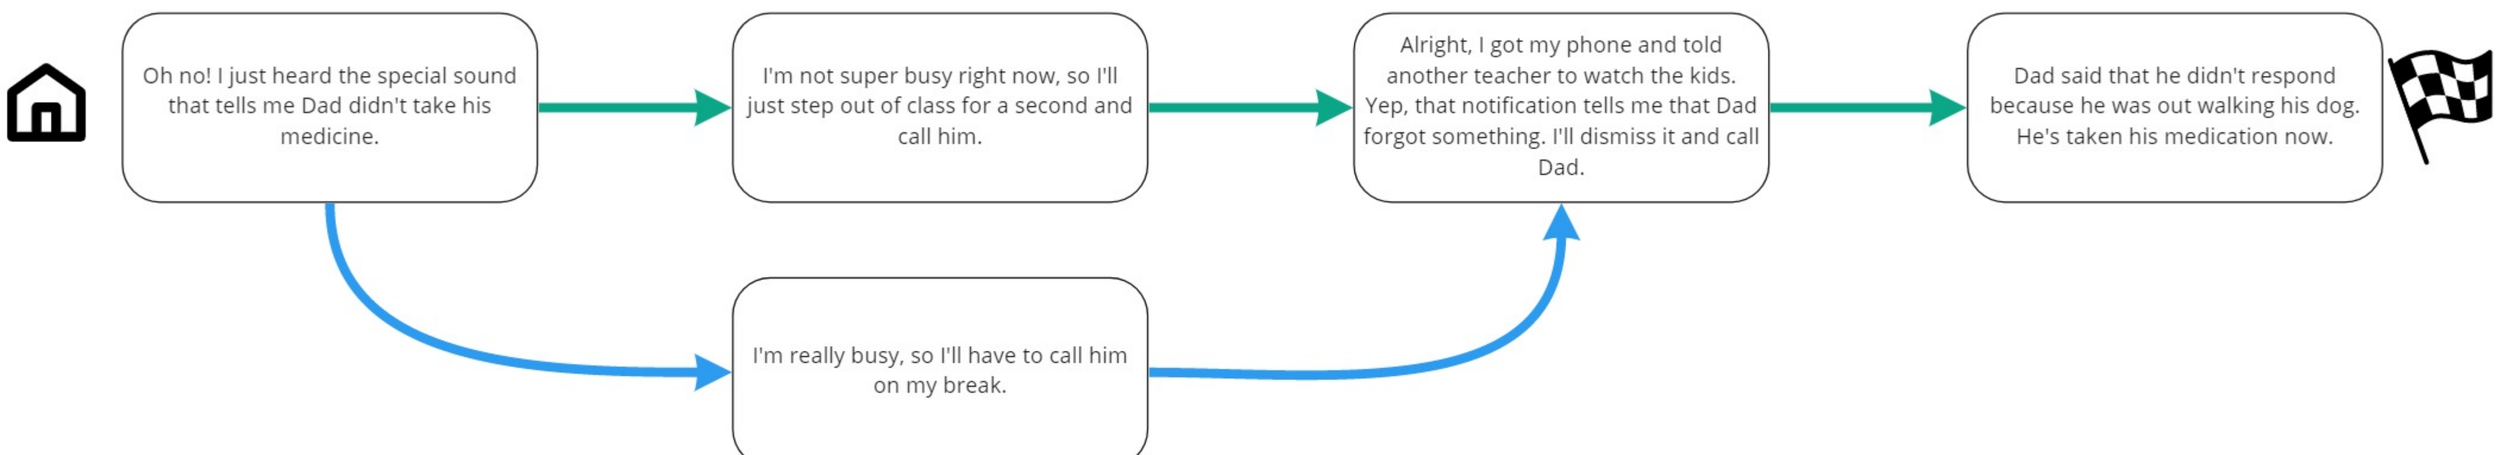
miro

Use Case 4: Notification for missed medication (Susy)

Customer: Susy

Start: I have to make sure that my father has taken his medication but I'm too busy to call him every day.

Goal: Get a reminder if my dad doesn't take his medication.



miro

Use Case 8: Add Medication for a Patient

Customer: Dr. Wheeler

Start: Bob was just prescribed a new medication. I need to add it to his schedule so he can start receiving reminders for it.

Goal: Add a medication to a patient's schedule.
